BOOK SYNOPSIS

This book is a revision of the most comprehensive book on the market - presenting the decisions an individual will need to make regarding the design, building, and operation of a greenhouse. It is written from a business perspective and contains step-by-step procedures, supplemented by examples and problems. Major new additions include the following: a new chapter on "Environmental Control Systems"; a chapter on "Fertilization" - the most comprehensive on the market; the most extensive coverage of "Water Quality; the latest information on greenhouse design regarding glass, plastic, and prices; an expanded section on greenhouse cooling, including new designs, fog cooling, and passive ventilation; more information on insect control and screening; and a post-production handling section which now includes containerized plants.
